REASON FOR ALLOWANCE

1. Rollings discloses a road gripping assembly for removably positioning on a vehicle wheel, the vehicle wheel including a rim having a plurality of threaded bolts extending therethrough, said assembly including a hub having an inner surface, an outer surface and a peripheral edge, said hub having a plurality of apertures extending therethrough, wherein the number of apertures equals the number of threaded bolts, each of said apertures being positioned for selectively receiving one of said threaded bolts, a plurality of telescopic arms spaced generally equidistant from each other, each have an attached end being attached to said peripheral edge and a free end extending outwardly away from said hub; a plurality of gripping members, each of said gripping members being pivotally coupled to one of said free ends such that said gripping members are selectively positionable in a stored position adjacent to a side wall of the wheel or in a gripping position abutting threads of the wheel. Joungh discloses a road gripping assembly comprising a hub comprising a lug with a recess which receives a plurality of claw plates, a pin is provided for adjustable securement of the claw plates. Etter and Armennante et al disclose various types of road gripping assembly for a vehicle comprising a hub with apertures that receive a plurality of threaded bolts, wherein a lock pin selectively extendable through aligned pairs of openings in first and second portion of each of the arms is provided in the manner defined in the instant claims 1 and 14 so as to secure the telescopic arms in position and in combination with other limitations of the claims. Therefore, claims 1-3, 8-13, depending therefrom, are considered to be allowable.
